

Barry Hookway

Web Developer & Designer

barry@bhookway.com – 07913 694806

Personal Summary

I've been designing and building websites since 1998, beginning with WYSIWYG editors before progressing to teaching myself HTML and CSS. Around 2001, as the requirements of the websites I was building grew, I branched out into PHP and MySQL, and have been using it ever since. My experience of building many hundreds of websites over the past 20+ years allows me to visualise new projects from start to finish and anticipate and solve any potential issues before the build begins. Since September 2010, I have been a full time self employed freelance web developer. My skills with Photoshop, HTML, CSS, PHP and MySQL allow me to design and build a complete website single handedly.

Key Skills

PHP
MySQL
HTML
CSS
Javascript/jQuery/Ajax
Photoshop

Areas of Expertise

Designing for the web
Converting a PSD to HTML
Database design
Bespoke web applications
Building responsive websites
Experience with many third party APIs, including social media platforms (facebook, twitter etc) and payment gateway providers (Stripe, Paypal, Barclays, DEKO etc)
Image manipulation in Photoshop
Search Engine Optimisation techniques

Examples of my previous work can be found on my portfolio website: www.bhookway.com
